

Libre Office  
csv files

If I open a cvs file separated by ”;” using default options and then I save it, the separator will be changed to ”tab”.

Column1;Column2;Column3  
1;VKE-03B;pdf  
2;VKE-03B;pdf  
3;VKE-03B;pdf  
4;VKE-03B;pdf

When I open it by Libre office, the separator ”Tab” and ”Semicolon” are by default selected.

User normally do not recognize this and afte changes saves again. After saving the file looks:

Column1      Column2      Column3  
1      VKE-03B      pdf  
2      VKE-03B      pdf  
3      VKE-03B      pdf  
4      VKE-03B      pdf  
5
